

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. SUPPLEMENTAL

CATALOGUE

OF THE

Chicago Law Institute.

Library

ACCESSIONS FROM

January 1, 1887, to January 1, 1894.

CHICAGO:
Printed for the Chicago Law Institute.

Rec. May 14, 1894.

PREFACE.

THIS supplemental catalogue of the Chicago Law Institute Library gives the number, and brief descriptions, of all books added to the library from January 1, 1887, to December 31, 1893, inclusive. It therefore supersedes the five annual supplements heretofore issued, and gives in addition the books added to the library during the year 1893.

This catalogue is intended for the members of the Institute, simply as an index, giving a concise inventory of the titles of books and subjects added to our library since December 31, 1886. As in the last annual supplements, the author and subject indexes have been consolidated under a single alphabetical arrangement. Under the various subjects are given the names of the authors of works devoted, wholly or in part, to that subject, or to a particular branch of that subject. For example, under "Railroads" are given not only such works as "Redfield on Railways," but also Schouler on Bailments, etc., only a portion of which touches upon the law of railways; and "Crosby and Bell on Electric Railways," which concerns only a particular branch of railway law. To ascertain just what work is thus referred to, one has only to turn to the author entry, where the title of the work is given in full. After each author's name in these subject entries has been added the date (of the copyright, as far as possible) of his work, thus enabling one at a glance to ascertain the latest work in the library on any given subject.

During the period covered by this supplemental catalogue about 7,500 accessions have been made to the library, which, on January 1, 1894, contained 27,362 volumes. Of these 1,205 were added during the year 1893.

As only a few copies of the catalogue published in January, 1887, in connection with which this supplemental part must be used, remain for distribution, the Executive Committee call the attention of members to the importance of preserving said catalogues.

A complete list of the officers of the Institute from the time of its incorporation to the present year, and also a list of the members and ticket holders on January 1, 1894, will be found in the appendix.
